

# LES POMPONS RONDS

Pour faire un pompon rond, il faut tout d'abord découper 2 disques troués dans du carton.

Ensuite, il faut superposer les 2 cartons et enrouler le fil plein de fois tout autour de ces 2 cartons.

Quand les cartons sont bien recouverts de plusieurs couches de fil (plus il y a de fil plus le pompon sera fourni), les écarter un petit peu, glisser la lame des ciseaux entre eux et découper délicatement les brins de laine entre les 2 anneaux de carton en suivant la forme du rond.

Passer un brin de laine entre les anneaux et nouer en serrant très fort.

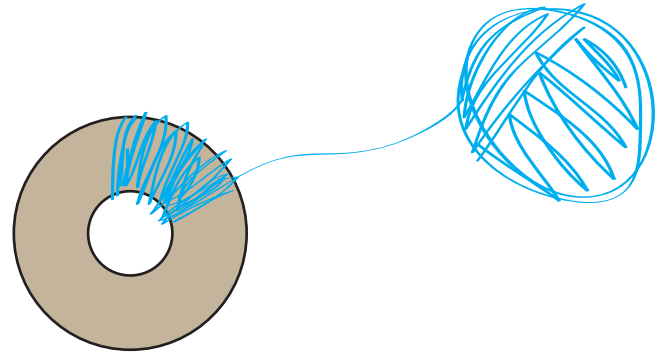

Sortir le pompon des anneaux en carton en les découpant au besoin, et égaliser le pompon.

# POMPONS

To make a pompon, you have to cut 2 disks of cardboard with a hole in it.

Then superpose the 2 cardboards and wind the thread a lot of times around the 2 cardboards.

When the cardboards are covered with a lot of layers of thread (the more thread you wind the thicker the pompon will be), separate them a little bit, slip the scissors blade between them and gently cut the threads between the cardboards following their shape.

Pass a piece of thread between the cardboards and make a tight knot.

Take the pompon out of the cardboards cutting them if you need, and equalize the pompon.
